Summary

- Having 2+ years of experience across diverse industries for entire life cycle model in Enterprise Applications.
- I bring 2+ years of expertise in MS Power BI development & 1+ years as a Data Scientist utilizing ML Algorithms. Proficient in designing and developing dashboards using MS Power BI Desktop, I collaborate closely with business teams to translate requirements into SQL queries and Dashboards.
- My skill set extends to creating various visualizations, including Bars, Lines, Heat maps, and Histograms. I excel in classification, regression, data analysis, and visualization, contributing to enhanced business efficiency. Additionally, I possess extensive knowledge in Python, leveraging libraries such as Numpy, Pandas, Django, and Matplotlib. As a passionate engineer and thriving analyst, I bring the ability to apply ML techniques effectively to address real-world business challenges.
- Good understanding of the principles and best practices in Agile, Scrum, and Waterfall methodologies.
- Self-motivated and provide innovative & cost-effective solutions to business problems.

Technical Skills

Language	Python, SQL	**Package**	Numpy, Pandas, Django, Matplotlib
Database	SQL Server, My SQL	**Statistics/ML**	Statistical Analysis, Linear/Logistic Regression
Data Visualization / Reporting	Power BI	**IDE & Tools**	Visual studio, PyCharm, Excel Macro

External Certification

- **PGP - Data Science and Machine Learning** | Intellipaat & MITxMicroMasters

Education

- **BE - Electronics and Communication Engineering** | Sethu Institute of Technology | 2021 | CGPA: 9.04

Professional Experience

Highbrow Technology Inc ***April 2024 – May 2025, Chennai, Tamil Nadu, India***

Data Scientist Developer

- Developed and implemented the machine learning model and managed large datasets using Python.
- Cleaned and pre-processed large datasets to identify trends and insights using Pandas and NumPy.
- Annotated and categorized real-world administrative task data to support the creation of a diverse, multi-dimensional dataset for training AI agents.

Sugi Infotech Private Limited ***July 2021 – Dec 2023, Madurai, Tamil Nadu, India***

Python Developer

- Coordinated quality testing with the assurance team and focused on resolving defects.
- Developed quality assurance procedures to minimize coding errors.
- Wrote efficient, reusable, testable, and scalable code.
- Understood, analysed, and implemented business needs, feature modification requests, and conversion into software components.

Projects

Google - Gemini ICE

Google Gemini: A cutting-edge AI model from Google that combines the strengths of natural language processing (NLP) and multimodal capabilities to handle text, images, and other data types. The model trained on vast datasets, excels at tasks like content generation, question-answering, and complex problem-solving.

Google – Generalized Agents

Google Generalized Agents: The objective is to create a fully diverse, multi-dimensionally annotated dataset that accurately represents real-world administrative tasks across various scenarios that AI agents can perform. The goal is to enhance efficiency, test capabilities, and build a robust simulated environment.

ISO Tracker

ISO Tracker is a cloud-based software platform with a modular structure, designed to streamline cross-organizational processes related to quality, compliance, and content management. It offers seamless compliance with various quality management standards, including ISO 9001 and similar frameworks. Technology: HTML, jQuery, Python, Django, Ajax, MySQL Database

Adventure Work Sales Analysis with Power BI

Conducted a comprehensive sales analysis for Adventure Works using Power BI, providing actionable insights and visualization of key performance indicators.

Customer Churn Prediction using Machine Learning

Implemented Machine Learning techniques to predict customer churn, enhancing retention strategies, and minimizing customer attrition.

Internships & Workshops

- Internship at "Phoenix Softech" on programming in Python | 13/07/2019 - 27/07/2019
- Workshop participated in "Skill Nation" on Business Intelligence using Power BI | 02/03/2024 – 03/03/2024
- Workshop engaged in "Jobaaj Learning" on Data Analytics | 10/03/2024 – 11/03/2024
- Workshop took part in "Be10x" on AI Tools | 10/03/2024
- Completed course on "NPTEL Online" in Digital Circuits with a consolidated score of 79% | 01/06/2018 - 31/10/2018

Awards/Achievements & Extra-curricular Activities

- Third prize in the "Start-up Ideas-Plan Contest-2020" for innovative project | 24/02/2020
- Active member of Rotaract Club | 07/09/2018
- Contributed and presented a paper at the National Level Technical Symposium on "Electronics and Communication Engineering."
