Experience

Linscan Pipecare Inspection, Noida

Data Analyst | May 2024 – Present

- Led data cleaning and feature-marking efforts for pipeline inspection datasets, **reducing review time by 18%.**
- Built automated scripts in Python for trend detection, enhancing anomaly identification accuracy .
- Integrated historical inspection data with real-time results, ensuring continuity in reporting.
- Collaborated with QA team to implement new DQA protocols, **raising data reliability standards by 90%.**

Deloitte Australia Data Analytics Virtual Internship

Job Simulation | Feb 2025 – Mar 2025

- Built interactive Tableau dashboards to visualize forensic analysis insights.
- Applied Excel modeling techniques to classify data and generate fraud detection strategies.
- Completed scenario-based consulting simulations reflecting real-world challenges.

Skills

- **Languages:** Python, SQL • **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** MySQL, Firebase • **Visualization:** Tableau, Power BI
- **Tools:** Excel, Google Analytics • **AI/ML**: TensorFlow Lite
- **Core Skills:** EDA, Data Cleaning, Data Integration, Dashboarding, Communication, Problem-Solving

---

Projects

Birdwatcher's Assistant: AI-Based Bird Species Classification and Info

• Developed a mobile App with offline bird species detection and information generation using **Python**, **Firebase**, and **TensorFlow Lite**, ensuring accessibility in remote areas without internet connectivity.
• Implemented and fine-tuned the Inception v2 CNN model, enhancing bird species detection and achieving 75% accuracy in classifying 500+ bird species.
• Authored a research paper on the project, published in the Journal of Artificial Intelligence Research & Advances.

Yearly Sales Analysis Dashboard

Tools: Python (Pandas, Seaborn), SQL, Tableau

- Analyzed multi-year order data to uncover seasonal trends and customer behavior patterns.
- Developed dashboards highlighting revenue drivers and conversion drop-offs.

EDA for Performance Optimization *Tools:*

Python, Power BI

- Processed and visualized 50K+ rows of raw data to uncover insights into client churn trends.
- Presented findings through actionable reports and data storytelling techniques.

Education

Bachelor of Science (Mathematics and Science)

Swami Vivekananda Subharti University, •Meerut • India Aug 2021 •70%

Certifications & Achievements

- Data Analysis – DUCAT
- AI/ML for Geo Data Analysis – ISRO
- Data Science & Analysis – IIT Delhi (World Technocon)
- Virtual Internships: Deloitte, Accenture, TCS – Forage
