MAHESH R G M

AI / ML DEVELOPER | +91 (95858 74820) | Chennai, Tamil Nadu | mahesh545443@gmail.com | LinkedIn | GitHub

EXECUTIVE SUMMARY

Results-driven AI/ML Developer with expertise in Python, SQL, Gen AI, NLP, Computer Vision, and Deep Learning, specializing in predictive modeling, automation, and AI-powered solutions to optimize business processes. Skilled in Supervised & Unsupervised Learning, Feature Engineering, Model Tuning, ANN, CNN, RNN, TensorFlow, and Keras, with a strong foundation in data visualization (Power BI, Tableau) and NLP (Text Mining, Sentiment Analysis, Word Embedding). Proven ability to deploy scalable AI applications, enhance model accuracy, and drive efficiency.

SKILLS

- Languages: Python, SQL, Advanced Excel
- AI & Machine Learning: Linear & Logistic Regression, Random Forest, XG Boost, Naive Bayes, Decision Trees (Grid Search, Feature Scaling), EDA
- Deep Learning: ANN, CNN, RNN, TensorFlow, Keras
- Data Visualization (Power BI, Tableau)
- RESTful APIs, CI/CD Pipelines, Reinforcement Learning, Model Evaluation, Image Classification.

PROFESSIONAL EXPERIENCE

AI / Python Developer

Dexa IT Solutions Pvt Ltd **April 2024 – Present**

- Deployed 7+ AI/ML models by implementing automation, predictive analytics, and recommendation systems, reducing manual effort by 32%.
- Developed Python-based AI solutions by integrating ML algorithm models and deep learning models, improving model accuracy by 26%.
- Optimized real-time AI applications by designing data pipelines and automating workflows, reducing processing time by 51%
- Managed Python web development tasks by handling planning, scheduling, email coordination, and content development, improving team efficiency by 35%.

Quality Engineer

Sped Die Casting **January 2022 – March 2023**

- Conducted over 103 quality inspections per month, ensuring 98% compliance with industry standards and identifying key trends for process improvements in aluminum die casting.
- Collaborated with a team of 17+ engineers and quality inspectors, facilitating bi-weekly meetings to align on quality improvement strategies and effectively communicate findings.
- Resolved 39+ production issues monthly by implementing data-driven solutions, leading to a 10% improvement in overall operational efficiency.

Quality Engineer

TATA Ficosa Automotive Systems Ltd **March 2021- December 2021**

- Analyzed data trends and prepared monthly reports on the quality issues, improving decision-making and operational efficiency by 29%.
- Conducted 500+ inspections and performance tests on materials, equipment, and products to ensure compliance with industry standards and customer requirements.

SELECTED PROJECTS

Counting Heads - Python, Machine Learning

- Achieved 95% accuracy in automated head-counting by utilizing TensorFlow, OpenCV, and VGG16 architecture, improving traditional methods by 20%.
- Enhanced model performance by 35% through Keras data augmentation, improving crowd scenario handling.

Ads-Click Through Rate Prediction - Computer Vision , Deep Learning

- Improved data quality by 51% through feature engineering and EDA, leading to better model training for ad click predictions.
- Achieved 95% accuracy in click-through predictions by applying machine learning models such as Logistic Regression, Decision Tree, and XGBoost, Random Forest, K-Nearest Neighbor, Naive Bayes.

EDUCATION

- **Postgraduate Program in Data Science and Analytics** **March 2024**
  Imarticus Learning, Chennai
  Relevant Coursework: Artificial Language, Data Structures and Algorithms, Mathematics and Statistics.
- **Bachelor of Mechanical Engineering** **July 2020**
  Sathyabama University of Science and Technology, Chennai

ADDITIONAL INFORMATION

- Languages: English (Fluent), Tamil (Native), Hindi (Intermediate).

- Soft Skills: Communication, Problem-Solving, Adaptability, Collaboration and Teamwork.
- Certifications: Python Bootcamp (Udemy).
