Certificates

- **Full stack Development course completed - Novi Tech**
- **Diploma in Computer Application and Business Accounting**
- **Typewriting English Junior**

Projects

Topic – Common Effluent Treatment Plant (CETP)
Objective – A **Common Effluent Treatment Plant (CETP)** is a centralized facility designed to treat wastewater from multiple industrial units, particularly in industrial clusters. It helps small and medium enterprises (SMEs) manage their effluent treatment cost-effectively while ensuring compliance with environmental regulations. CETPs use various treatment methods, including physical, chemical, and biological

Projects

processes, to remove pollutants before discharging treated water into the environment.
