Career Objective

To obtain a challenging role as a **Data Analyst, Business Analyst,** or **Analytics Manager (Junior/Entry Level)**, leveraging **12 years of experience in web data extraction and handling**, along with proficiency in **SQL (MYSQL), Excel, Python, and Power BI**, to deliver actionable insights and support data-driven business decision-making.

Professional Summary

- **12 years** of experience as a **Web Content Developer** with expertise in extracting, structuring, and managing web data for business use. Specialized in both manual and tool-based web data extraction, HTML analysis, and data formatting.

- **9 months** of experience as a **Customer Support Executive**, managing student data registrations, coordinating training sessions, preparing reports, handling certification processes, and supporting quality analysis and management communication.

- Proficient in **SQL (MYSQL), Excel, Python, and Power BI**, with hands-on project experience in data visualization and data analytics.

- Proficient in data cleaning, dashboard development, and presenting actionable insights for business growth

---

Technical Skills

- **Programming Languages:** Python, SQL
- **Data Visualization:** Power BI, Matplotlib, Seaborn
- **Data Manipulation:** Pandas, NumPy
- **Database Management:** MYSQL
- **Web & Data Technologies:** HTML, Screen Scraper Tool
- **Other Tools:** Excel, Jupyter Notebook

Certification

Master Program – Data Analyst| FITA Academy, Chennai| Apr 2025 - July 2025 (3 Months)

Projects

Project 1 : Training Participants (Basic/Intermediate) Analysis

Objective : Developed an interactive Power BI dashboard to analyze employee training participation by level, Manager, Gender and department.

Tools/Technologies : Excel, Power BI, DAX

Key Contributions :

- Cleaned and segmented data using Excel.
- Built dynamic visuals using bar chart, column chart, pie chart, treemaps and slicers for detailed filtering and analysis.
- Used DAX to calculate key metrics like attendance and completion rates.
- Delivered insights on training coverage, absentee trends, and department engagement.

Outcome :
Enabled data-driven decisions to improve training strategies and boost participation.

Project 2 : E-commerce Sales Analysis

Objective :
Analyzed e-commerce sales data by designing a normalized database and using Python for data extraction and analysis to support transactional reporting and deliver business insights.

Tools/Technologies : Excel, SQL, Python(Pandas, Matplotlib, Seaborn)

Key Contributions :

- Designed and built a normalized relational database (Customers, Orders).
- Populated data and wrote complex SQL queries to extract sales trends, top products, and customer behaviour.
- Connected SQL with Python to clean, transform, and analyze the data using Pandas.
- Performed EDA and created data visualizations for sales performance, order volume, and customer value.
- Delivered reports that identified high-performing products, repeat customer behaviour, and areas for improvement.

Outcome :
Enabled data-driven decisions by providing key sales insights, improving marketing strategies, and laying the foundation for future dashboards and predictive models.

Project 3 : Video Game Sales Trend Analysis

Objective :
To identify regional sales trends and correlations in global video game sales data.

Tools/Technologies : Excel, Python(Pandas, NumPy, Matplotlib, Seaborn)

Key Contributions :

- Cleaned and structured data using Python libraries (Pandas, NumPy) to ensure accuracy.
- Performed exploratory data analysis to identify top-selling games by region, genre, and platform.
- Conducted correlation analysis between user/critic scores and global sales.

- Built insightful visualizations (bar charts, column charts, pie charts, line plots, histogram) using Matplotlib and Seaborn.
- Identified market trends such as regional preferences and yearly sales fluctuations.
- Delivered actionable insights to understand consumer behaviour and platform performance.

Outcome :
Revealed sales patterns by region and platform, identified top-selling genres, and found correlations between critic scores and global sales.

Professional Experience

Web Content Developer

Orange Consulting | T.Nagar, Chennai | April 2013 – March 2025

- Specialized in web content scraping for USA-based cruise travel websites.
- Extracted and processed data from various online sources using Excel and screen scraper tools.
- Developed and optimized HTML code for effective data extraction.
- Converted data from HTML to XML format accurately.
- Debugged extraction issues and ensured secure file delivery to U.S. clients.

Customer Support Executive

CADD Centre Training Services | Guduvancheri, *Chennai | July 2012 – April 2013*

- Assessed training needs and recommended courses.
- Managed student registration, materials, and ID issuance.
- Coordinated schedules, tracked feedback, and certification.
- Prepared regular reports and supported resource planning.
- Ensured quality and maintained communication with management.
