Exhibit an understanding of Data Analytics, Project Management, and Generative AI, coupled with a strong foundation in IT Service Management and Compliance. Seeking opportunities in dynamic and growth-driven environments, preferably in Hyderabad or Bengaluru, to deliver impactful and innovative solutions.

Roles & Responsibilities

Solution Design and Documentation: Created and updated comprehensive Solution Design Documents, ensuring clarity and alignment with project objectives throughout the lifecycle.
Team Leadership: Oversaw module associates in developing, testing, fine-tuning, and deploying models, fostering collaboration, and delivering quality results.
Issue Resolution: Identified and resolved defects and performance issues during the monitoring phase, ensuring system stability and efficiency.
Cloud Environment Management: Guided the setup of GCP/cloud environments, including Docker installation and GPU configuration, optimizing computational resources.
Model Deployment: Managed phased updates of machine learning models, ensuring smooth deployment and ongoing support.
Support and Troubleshooting: Provided prompt responses to training, monitoring, and deployment challenges, delivering effective solutions to daily issues.
Risk and Change Management: Communicated project risks and issues to project leads, contributing to change control and decision-making processes.
Agile Practices: Actively participated in Agile ceremonies, including Daily Standups, Sprint Retrospectives, P.O.C Demos, and presentations to senior leadership, driving project transparency and stakeholder engagement.
Cross-Team Collaboration: Collaborated with leads and team members across modules to provide advice, troubleshooting support, and promote best practices.
Training and Mentorship: Mentored colleagues through training programs on platforms like Coursera, Google, Next Platform, and Pluralsight, fostering professional development and skill enhancement.
Remote Work Flexibility: Demonstrated ability to deliver high-quality results in remote settings, leveraging effective communication, collaboration tools, and time management to ensure seamless execution and stakeholder alignment across geographies.

Education	Course	Institution	Board/University	Year of Passing	Aggregate
	MCA	**New Horizon College of Engineering.**	VTU	**2018**	**8.04 CGPA**
	BCA	**AMES Degree Sciences College.**	Gulbarga University.	**2016**	**62%**

Work Experience

CO – FOUNDER CTO | QOUMI SECURITY SOLUTIONS (QSS) | INDIA
August 2023 – Present

As CTO at Qoumi Security Solutions (QSS), I play a pivotal role in supporting the company's overall strategy and leading initiatives that drive innovation and growth. I work closely with clients and teams to understand specific challenges and provide tailored solutions that enhance operational efficiency and security practices.

My role involves guiding a skilled team, fostering collaboration, and ensuring seamless project execution while maintaining alignment with organizational objectives. I focus on building strong client relationships and strategic partnerships to expand our offerings and stay competitive in a dynamic industry. Additionally, I manage resources effectively to streamline operations and support the achievement of business goals, ensuring QSS remains a trusted partner for its clients.

ASSOCIATE CONSULTANT | CAPGEMINI | BENGALURU, INDIA

August 2021 – May 2023

Ecommerce Website Campaign Analysis

- Conducted campaign analysis using BigQuery and Looker, leading to a 15% increase in conversion rates.
- Integrated and cleaned data from multiple sources to ensure accuracy and reliability.
- Utilized SQL and Looker for data modelling and visualization to deliver insights into website traffic and customer behaviour.
- Analysed channels and product categories, identifying areas for improved design and messaging.

Digital Twin for Sustainable Transportation

- Built a digital twin using Colab, OSMNX, OSRM, Google Maps API, and Looker, reducing carbon emissions by 20%.
- Simulated vehicle performance based on routes and driving conditions to optimize eco-friendly driving.
- Real-time carbon emissions calculation supported actionable feedback for route planning.
- Enabled fleet management capabilities to monitor emissions and pinpoint areas for improvement.

A2B (Migration of SAS to Python)

- Developed an accelerator using GPT-3 for SAS-to-Python code conversion, cutting conversion time by 30%.
- Fine-tuned GPT-3.5 Davinci for accurate recognition of SAS functions and Python generation.
- Designed and evaluated a framework for conversion accuracy evaluation.
- Configured GPU instances on Google Cloud to enhance computational efficiency.
- Actively participated in stand-ups, documented minutes (MOMs), and contributed to sprint planning.

Skills Used	Data Analytics, Core Python, Snowflake, SQL, PostgreSQL, Claude, Cohere, GDS Looker, Tableau, GPT (3, 3.5, 4), NLP, Generative AI, Google AI Studio, Google Colaboratory.

SOFTWARE ENGINEER | YOUNG INNOVATION| RAICHUR, INDIA

January 2019 – June 2021

Customer Relationship Management

- Developed a flexible CRM system with a focus on adaptability to meet diverse needs.
- Integrated classic functionalities for managing contact and organization information, including relationship tracking such as memberships.
- Implemented modern features like engagement tracking to enhance customer interaction analysis.
- Designed customizable one-page donation forms to streamline donation processes.
- Ensured seamless integration with website functionalities, including event registration.

Achievements

- First place winner of the Generative AI International Hackathon, leveraging the Cohere Language Command Model.
- Contributed to the Swachh Bharat Abhiyan initiative by cleaning the Tungabhadra and Krishna riverbanks and planting over one thousand trees.
- Successfully managed a team of 10 Junior Analysts.
- Achieved second position in the I&D GEMS Global Cohort Olympiad organized by Capgemini.
- Secured third position in the I&D GEMS India Cohort Olympiad organized by Capgemini.
- Environmental conservation

Skills

- Conflict management
- Strong interpersonal & communication skills.
- Effective problem-solving abilities.
- Meticulous attention to detail.
- Poised under pressure.
- Collaborative team player.

Interests

Tech Innovation: Exploring emerging technologies, especially in AI, Generative AI, ML, and data science.
Leadership in Tech: Mentoring and leading teams to drive impactful technology solutions.
Cybersecurity: Passionate about improving digital security and developing secure systems.
Community Engagement: Actively contributing to tech communities and helping others grow their careers in tech.
