SUMMARY:

A data-driven problem solver with a passion for extracting meaningful insights from complex data. Skilled in leveraging statistical techniques and machine learning algorithms to uncover trends and patterns.
Proficient in Python, SQL, Tableau, and Excel to develop innovative solutions that drive business decisions. Possesses a strong foundation in econometrics and a keen interest in AI, including neural networks, CNN, computer vision, and NLP. A collaborative team member with excellent communication skills, eager to contribute to cross-functional teams and deliver impactful results.

TECHNICAL SKILLS:

- Python - Jupyter notebook, Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn.
- SQL - RDBMS, DDL, DML, DQL, SQL (Operator, Functions, Clause), Joins, Subqueries, Window functions
- Ms office Excel – Data collection, Data cleaning, Pivot table, Charts, Filters, Data manipulation, Statistics analysis, Regression, Data mapping.
- Tableau - Data Visualization, Dashboard Presentations, Data Storytelling.
- Power BI - Data Structuring, Data Modeling, Data Visualization, Data Mapping, Reporting Dashboard Design and Storytelling.
- Machine learning - Supervised Learning – Linear Regression and Logistic Regression Statistical methods - Hypothesis testing, Algorithms, Problem solving.
- Soft skill – Knowledge in Logical, Innovation and critical thinking, Fast-paced Collaborate, Analytical Problemsolving, Dedicated and Leadership skills, Dynamic environment, Communication, Adaptability, Attention to detail.

WORK EXPERIENCE:

Data analyst, Straive, Chennai. *(01/2024 - Present)*

Roles and Responsibilities:

- Research, extract, Analyzing data and validate ESG information through standard company reports and other trusted sources.
- To identify various named entities from Environmental, Social, and Governance (ESG) documents, including 10k and Annual Reports, to analyze data organizational growth.
- ESG data extraction and suggest methods to enhance the data quality of the data sourced Implementation of quality control measures and oversee research.
- Created a dashboard that visually represented key business metrics in real-time, allowing for quick and informed decision-making by management.
- Utilize power BI to create and display key performance data on interactive dashboard for enhanced visualization and decision making.

INTERNSHIP PROJECTS:

Project Title: Impact of product positioning on sales (Python):

Analyses FMCG data: Explore datasets on product positioning, sales performance, and consumer behaviour to identify patterns and trends.

Understand relationships: Investigate the influence of various factors on sales performance and consumer behaviour, and how product positioning affects these relationships.

Key skills: Data manipulation and techniques, Python libraries, Large dataset handling, Data visualization

Project Title: Film Rental (SQL):

Database Management: Utilize MySQL to create and manage a database for tracking film rentals, customer information, and inventory.

Report Generation: Develop reports using SQL queries to provide insights into rental trends, customer preferences, and inventory management, enabling informed business decisions. **Key skills**: Joins, window functions, Subquery, View tables, Analysis

Project title: Sales insights of a company- (MySQL & POWER BI)

Data Extraction and Analysis: Utilized SQL to extract and analyses over 15,000 transactions from a manufacturing company's database

Data Modeling and Visualization: Developed a star schema data model in Power BI and created interactive dashboards to visualize key sales metrics and trends.

Key skills: Joins, window functions, Subquery, View tables, Analysis, Data Visualization, Dashboard Design, Storytelling

Project Title: Car claims and insurance (Tableau Dashboard):

Data Visualization: Utilize Tableau to create interactive dashboards that visually represent patterns, trends, and insights from the car claims and insurance dataset.

Decision Support: Provide insurance companies with actionable insights derived from data analysis to improve decision-making processes, such as risk assessment, fraud detection, and customer segmentation.

Key skills: Exploratory Data Analysis, Data-driven Decision Making, Data Visualization, Dashboard Design, Storytelling.

CERTIFICATION:

- Python and Data Analytics
- Introduction to Natural Language Processing
- Basics of exploratory of Data Analysis
- SQL (Basic)

EDUCATION:

DATA ANALYTICS (July - Dec/2023)
Great Lakes Institute of Management

B.COM (2019 - 2023)
Jamal Mohammed College, Trichy
