SRI SOUNDHARYA

[☎] +91 8124661233
msrisoundharya.01@gmail.com

Area of Proficiency

- Python (Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib)
- SQL (MySQL)
- Tableau (Interactive Dashboards & Reports)
- Machine Learning
  - Supervised & Unsupervised Learning
  - Predictive Modeling
  - Clustering
  - Principal Component Analysis (PCA)
  - Time Series Forecasting
  - Feature Engineering
  - Model Evaluation
- Analytics & Business Intelligence
  - Data Cleaning & Transformation
  - Exploratory Data Analysis (EDA)
  - Statistical Analysis & Hypothesis Testing
  - RFM Analysis & Customer Segmentation
  - Market Basket Analysis
  - Supply Chain Analytics

KEY Strengths

- **Communication** – effective oral and written communication skills with an ability to articulate arguments in a persuasive and concise manner.
- **Analytical skills** – ability to evaluate information and deep dive and arrive at solutions and alternatives.
- **Data Storytelling & Visualization** – ability to transform complex data into intuitive visualizations and clearly narrate to support strategic decision-making.
- **Insight Generation & Recommendation Framing** – adept at deriving actionable insights from data and framing recommendations aligned with business goals.
- **Leadership** – Self-starter and a good team player.

Academic Qualifications

- Post Graduate Program in Data-science and Business Analytics 2024
- Bachelor of Engineering in Civil 2019

Certifications

Data Science and Business Analytics

Certificate

Executive Summary

Aspiring Data Analyst with a solid foundation in SQL, BI tools like Tableau, Knime, and Python, gained through academic projects and practical training. Passionate about uncovering insights from data to support informed decision-making and solve real-world problems

Skilled in data analysis, visualization, and statistical techniques with a strong understanding of business contexts. A quick learner and effective communicator, eager to apply analytical skills and grow within a dynamic, data-driven environment.

Skills

Tools	**Tableau, Knime**
DB	**MySQL**
Programming	**Python**

Academic Projects

- **Supply Chain Optimization – FMCG Sector**
  Built a machine learning model on FMCG supply chain data to optimize warehouse shipments, reducing error by 37% with 99% accuracy; identified inefficiencies and aligned supply with regional demand.
- **Customer Buying Patterns & Revenue Boost**
  - Performed RFM analysis on automobile parts data to segment customers and suggest marketing strategies.
  - Used market basket analysis on grocery POS data to recommend revenue-boosting combos and discounts.
- **Financial & Risk Analytics**
  - Predicted company default risk using financial data, improving recall from 4% to 27%, with 74% accuracy and an F1-score of 0.31.
  - Evaluated portfolio risk using volatility analysis and optimized risk-adjusted returns.
- **Data Visualization – Insurance Claims**
  Developed interactive Tableau dashboards to visualize insurance claims data, revealing patterns by car type, gender, age, and occupation to support policy decisions.
- **Time Series Forecasting – Wine Sales**
  Analyzed historical monthly sales data and forecasted monthly wine sales using time series models, reducing RMSE by 63% and recommending the optimal 12-month forecast model with 95% confidence intervals.
- **SQL Analytics – New Wheels Case Study**
  Analyzed disorganized sales data of New-Wheels using MySQL to address declining sales and customer feedback; delivered insights and visualizations for the Quarterly Business Report with actionable recommendations.
- **Text Analytics**
  Analyzed Donald Trump's tweets to study sentiment trends before and during his presidency; performed text preprocessing, generated sentiment-based word clouds, and extracted key behavioral insights.
- **Customer Profiling – EasyVisa**
  Built a predictive model on visa applicant data to streamline approvals, achieving an F1-score of 82% and 74% accuracy, enabling data-driven profiling based on significant influencing factors.
- **Churn Prediction – ExtraaLearn**
  Developed a lead conversion model using EdTech data, boosting recall from 60% to 87% with an F1-score of 76%, enabling better prospect targeting.
- **Segmentation – Clustering & PCA**
  - Conducted EDA and segmented 23,066 digital marketing records into 5 clusters.
  - Applied PCA to census data, reducing 59 features to 6 components explaining over 90% variance.
