SUMMARY

Accomplished Business Intelligence Developer with 2 years of experience and having expertise in data analysis and visualization. Demonstrated expertise in developing robust BI data models, conducting insightful SQL analysis, and designing visually appealing dashboards across various BI platforms, fostering data-driven decision-making across the organization.

EDUCATION

A.P.J. Abdul Kalam Technical University Uttar Pradesh
Bachelor of Technology *CGPA: 7.15*

EXPERIENCE

DRIGHNA TECHNOLOGY PVT. LTD **Sep- 2023 - Present**
Data Analyst *Bengaluru, India*

- **Constructed DataMart's:** Designed and implemented efficient DataMart's using MySQL, Snowflake, and SSMS, enhancing data organization and retrieval processes for the insurance and Manufacturing sectors.
- **Building Reports Using Generative AI and Generative BI Tools :** Skilled in building reports. Using Generative AI degenerative BI Tools, leveraging advanced AI capabilities to create insightful, dynamic, and automated data visualizations
- **Developed BI Reports:** Created comprehensive and insightful insurance and Manufacturing reports, utilizing PostgreSQL, Snowflake, SharePoint and SSMS as data sources, and visualized them using Power BI, Tableau, Pyramid BI, and Qlik Sense.
- **Optimized Dashboards:** Spearheaded the development, updating, and optimization of dashboards, reports, and KPI scorecards in Power BI, Pyramid BI, and Qlik Sense, ensuring alignment with business requirements and strategic goals.
- **Managed Data Processes:** Transformed Excel data into .csv files using Python for seamless processing and integration into PostgreSQL, Snowflake, and SSMS databases.
- **Established Data Warehouses:** Built and maintained robust data warehouses in Snowflake using Qlik Compose, guaranteeing data consistency and reliability across multiple sources for insurance and healthcare data.
- **Conducted Data Analysis:** Performed in-depth data analysis to uncover trends, patterns, and anomalies within the insurance and Manufacturing sectors, providing actionable insights that supported data-driven decision-making processes.
- **Performance Monitoring:** Monitored key performance indicators (KPIs) and metrics to track business performance, identify areas for improvement, and drive continuous improvement initiatives in the insurance and Manufacturing domains.

Project

Project 1: 360° Manufacturing Report
Clients: Resistoflex, Noida (Onsite) ***Duration: Jan 2025 – Present***

- Extracted data from TCS ion, converted it to JSON, and integrated with **Qlik Sense API & Tableau** for real-time 360° visualization.
- Developed an interactive report with KPIs and advanced analytics to improve manufacturing process efficiency and decision-making.

Project 2: Migrating all dashboards from Pyramid BI to Power BI and Qlik Sense
Clients: Cloverleaf (Offsite) ***Duration: April 2024- Dec 2024***

- Analyzed existing **Pyramid BI** dashboards to identify data sources, visualization components, and business logic.
- Rebuilt and optimized **data models** in **Power BI** &**Qlik Sense** to enhance data processing efficiency.
- Designed interactive and user-friendly **Power BI** & **Qlik Sense dashboards** with enhanced **visualizations and KPIs**.

Project 3: End-to-End Data Warehouse & Insurance 360 Report
Clients: Players Health (Offsite) ***Duration: Dec 2023 – March 2024***

- Built DataMart on SAP HANA and developed **Power BI & Tableau** reports for Sirius Point, Crawford, and Socotra.
- Automated data processing using Python, integrated data into PostgreSQL, Snowflake, and SQL Server, and ensured data accuracy using Metabases.

SKILLS

Technologies Used: Python, SQL, Power BI, DAX, Tableau, Pyramid BI, Qlik Sense, Qlik Compose, Qlik Replicate, SSMS, MySQL, Excel, Snowflake, AWS, Azure Synapse, and Redshift.
Core Expertise: Data Analysis, Performance Monitoring, Visualization, Data Modelling, Business Intelligence Reporting, Data Integration and Management.

ACHIEVEMENTS

- Behavior Catalog Award.
- Dedicated Performer (Q2, 2024).
- Pyramid Certified
